

## InvestmentManager™ Selected by Top 10 Global Custodian

### London, 1 December 2009 -

Odyssey Financial Technologies, a global provider of Asset Management software solutions and services, announces that its InvestmentManager™ portfolio management system has been selected by one of the world's top 10 global custodians. InvestmentManager™ will be progressively deployed to support its currency management services on a worldwide basis.

Following an extensive selection process, InvestmentManager™ was identified as the best match for the organisation's strategic evolution, based on providing a scalable, currency-centric portfolio management system with comprehensive exposure monitoring. The corporate stability provided by Odyssey and its desire to work as a strategic partner were also key factors in the selection process. From early 2010, the global custodian will be using InvestmentManager™ to provide its clients with the ability to protect assets against adverse currency movements, using various financial instruments and hedging strategies.

InvestmentManager™ is an advanced, analytical front office decision support solution covering the full range of multi-asset, multi-currency portfolio management requirements. It is designed to give portfolio managers control, enabling faster and easier tracking of the investment process from historical performance and attribution through what-if and portfolio modelling to forward looking scenario analysis. The latest version includes a powerful new element - Recon - providing daily data consistency checks for improved accuracy. This data quality aspect is particularly important for those customers using InvestmentManager™ to automate the execution of investment strategies on the basis of small changes in that underlying data.

### About Odyssey Financial Technologies

Odyssey Financial Technologies is a global financial technology company specializing in front and middle-office software for the Private Banking, Private Wealth Management and Asset Management industries. Over 200 financial institutions in more than 30 countries have chosen Odyssey software products to increase their client service capabilities, reduce costs, and generate additional revenue. Founded in Luxembourg in 1995, Odyssey has offices in the key financial centres, including New York, Singapore, Zurich, Frankfurt, Munich, Brussels, Geneva and Tokyo. Odyssey's operational head office is located in Lausanne, Switzerland. The development centres are located in Toronto, Lausanne and London.
